ALIYAN (ALI)

CYBERSECURITY TRAINEE & WEB SECURITY ENTHUSIAST

📍 Nazimabad No. 2, Karachi, Pakistan ✉️ alisecurity8080@gmail.com 📞 03222264829

🔗 github.com/alisecurity8080

PROFESSIONAL SUMMARY

Motivated and detail-oriented Security Enthusiast & Developer with strong expertise in Web Application Vulnerability Research, Burp Suite Exploitation, Python Programming, Linux Systems, and Networking. Specialized in identifying critical security flaws including IDOR, CSRF, and Business Logic Vulnerabilities. Eager to contribute to a software house/security team as a Junior Cybersecurity Intern / Security Trainee / Python Developer while gaining hands-on industry experience.

CORE SKILLS & SECURITY EXPERTISE

Web Application Security (Core Expertise)

- **Insecure Direct Object References (IDOR):** Testing unauthorized parameter modification, access control bypasses, and object-level authorization flaws.
- **Cross-Site Request Forgery (CSRF):** Crafting PoC exploits, bypass analysis, token validation testing, and same-site cookie behavior.
- **Business Logic Flaws:** Identifying workflow bypasses, privilege escalations, and functional manipulation in web application logic.

Security Tools & Scripting

- **Burp Suite (Pro/Community):** Intercept Proxy, Repeater, Intruder, Match & Replace rules, Scope configuration, CA Certificate installation, request/response manipulation.
- **Programming & Automation:** Python (Data Structures, Functions, File I/O, Error Handling, Automation Scripts), Git/GitHub.
- **Environments & Networking:** Linux Navigation & CLI Tools (Ubuntu via WSL 2), TCP/UDP, DNS, HTTP/HTTPS Request/Response Analysis.

TECHNICAL PROJECTS & SECURITY LABS

Web Security Research & Vulnerability Testing — Hands-on Labs

- **Web Application Exploitation & PoC Development:** Conducted hands-on security assessment labs focusing on HTTP parameter tampering, CSRF PoC generation, and IDOR vulnerability exploitation.
- **Burp Suite Traffic Analysis:** Frequently used Burp Suite Proxy and Repeater to capture, analyze, tamper, and replay client-server web traffic to discover hidden logic flaws.

Python Automation & Development — Development

- **CLI Automation Scripts:** Built functional Python applications utilizing conditional logic, input validation, and file manipulation.

EDUCATION

Matriculation (Class 10 - Science)
Board of Secondary Education Karachi (BSEK)
Status: In Progress (Private Candidate)

LANGUAGES

- **Urdu:** Native / Fluent
- **English:** Working Knowledge (Technical Docs & Reading)
